WORK EXPERIENCE

Software Developer

VINAM SOLUTIONS PVT LTD -

2016-06 - 2017-12

Here are some of my recent projects in software development:

1) Vinhrm
• Vinhrm is a hr management application software meant for effective employee
management and to meet accurate finance management to grow a business.
• It provides all-in-all details of a company and employee recordings that helps for easy
scheduling of work and task management.
Job Role
• Developed and implemented a complete dynamic system for payroll processing.
• Built in such a way to meet all technology changes.
• Wrote code for generating monthly report based on biometric and attendance data.
• Developed a calendar model for effective tracking of attendance and work hours.
• Designed and setup a notification and email message for leave and regularize actions.
• Implemented a import option for importing basic employee data with provision to choose which one is mapped
with database field.
• Designed and implemented a salary revision method based on salary revision period.
Meanwhile there is a option to process payroll data individually.
• Designed and developed for multiple company management with in a organization.
• Contributed in providing suggestions to increase usability and productivity of the application software.
Technology used: PHP, Ajax, JavaScript, Angular.js, jQuery, MySQL, json, Google API,
Webservices, HTM, CSS, Git.
Framework used: Codeigniter.
Project Total Time: One and half year.
